

MANISH CHANDRA

Frontend Engineer

+91 - 9100693807 manishchandra58@gmail.com www.linkedin.com/in/manishcm Portfolio Hyderabad, TG

SUMMARY

I am a Frontend Engineer with over 4 years of experience in creating scalable and high-performance web and mobile applications. I specialize in technologies like React, Next.js, React Native, and TypeScript. My expertise includes real-time applications, data visualization, and frontend architecture. I thrive in collaborative environments, focusing on optimizing performance and creating intuitive user experiences

SKILLS

React.js	Next.js	TypeScript	JavaScript	React Native	Redux
React Query	Node.js	FastAPI	Express.js	REST APIs	GraphQL
Apollo Client	Tailwind CSS	HTML5	CSS3	WebSockets	
Storybook	Git	Bitbucket	Jira	Python	SASS
					WebRTC
Performance Optimization					

EXPERIENCE

Frontend Engineer (React)

SwitchOn 01/2024 Bangalore, KA

A company focused on building innovative vision inspection solutions

- Built real-time applications using socket-based camera streaming and live inference systems
- Developed interactive data visualizations and custom Canvas-based tools for enhanced inhouse image layering/processing tools
- Optimized frontend performance for large datasets and touch-friendly interfaces
- Implemented RBAC and ABAC systems for secure and scalable permission management
- Worked with React Native for mobile video capture, live streaming, and inference result visualization
- Focused on responsive UI architecture, efficient state management, and scalable frontend patterns

Frontend Engineer (React)

AnalyticEdge 10/2021 - 08/2023 Bangalore, KA

A company specializing in data analytics and insights through advanced technology

- Increased efficiency by 60% through developing reusable UI components and data dashboards with React.js and TypeScript
- Implemented performance optimization techniques for large-scale analytics applications
- Collaborated with cross-functional teams to deliver stable and bug-free UI deployments
- Led and delegated tasks to junior developers while ensuring code quality standards
- Developed internal user management systems and secure login flows with RBAC implementation

Frontend Engineer Intern

AnalyticEdge 07/2021 - 10/2021 Bangalore, KA

A company specializing in data analytics and insights through advanced technology

- Increased development efficiency by 35% by creating in-house reusable component libraries with Storybook.
- Collaborated within development teams and contributed to frontend feature delivery.

PROJECTS

Google Meet Clone (Next.js)

12/2023

Built a full-stack video conferencing platform using WebSockets and WebRTC for real-time communication

Sketchbook (Next.js)

11/2023

Built a collaborative real-time sketch app with WebSocket multi-session sync.

Next.js E-commerce Application

11/2022

Created a full-stack e-commerce platform using Next.js with scalable frontend architecture

Social Media MERN Application

01/2021

Built a social media platform mockup using MongoDB, Express.js, React, and Node.js

CERTIFICATIONS

Frontend Expert - AlgoExpert.io

A program focused on frontend development skills

Certified React.js – Advanced - Cutshort

Advanced certification in React.js covering in-depth concepts and advanced features

Certified JavaScript – Advanced - Cutshort

Advanced certification in JavaScript covering advanced techniques and practices

Certified HTML/CSS – Advanced - Cutshort

Advanced certification in HTML and CSS, focusing on best practices and techniques

Data Structures & Algorithms in Python - Coding Ninjas

Certification focusing on data structures and algorithms using Python

Advanced Web Development with React – Full Stack - Coding Ninjas

Comprehensive course on advanced frontend web development using React

Specialization in UI/UX - Adobe

Specialization in UI/UX focusing on design principles and user experience

EDUCATION

Bachelor of Technology in Computer Science

GuruNanak Institution of Technology

08/2020 - 10/2020

Hyderabad, TG
